

PAS SWiftPlus - Tips

SWiftPlusSWiftPlus Tips

SWiftPlusSWiftPlus does not time out. Ensure you log out on the PC when you have finished using the system.

- If the screen appears to freeze, press **F5** to Refresh.
- **Do not use** the right mouse click. Left click once will display the available actions.
- If another user is accessing the same patient only one will be able to complete an action.
- If another user is in the same ward view in PAS this will lock the ward and you will not be able to complete any actions in SWiftPlusSWiftPlus.
- **Filters** - columns can be filtered by clicking on the sort up and down buttons at the top of any column displaying these symbols.

Bed Ord ▲▼	Bay ▲▼	Bed ▲▼	Short Name▲▼	Adm.Date ▲▼	OS Test Assessments ▲▼	MH ▲▼	Occupational Therapy▲▼	physio ▲▼	Calculated Length of Stay▲▼	Date Ready Disch ▲▼
------------------	-----------	-----------	-----------------	----------------	------------------------------	----------	---------------------------	--------------	-----------------------------------	------------------------------

Where the columns display a data field (as below) you are able to enter the search criteria, for example the surname or consultant name or the code.

Note, – if your ward is using the consultant full name you will need to duplicate this in the search field, for example Dr R Bland.

Click on the magnifying glass beneath the data field to start the search.

Name <input type="text"/>	Sex ▲▼	Consultant <input type="text"/>
-------------------------------------	---------------	---
