

DCCR - Community Services Information

Overview

Community information is currently provided by Livewell Southwest and University Hospitals Plymouth NHS Trust (UHP) and information, such as appointment information, referrals, allergies and problems will be available.

Viewing Community Information

There is no single menu item for Community data. Available information is accessed via the Clinical Document Viewer (CDV) tree as indicated in the table below.

Community information	CDV Tree Menu	Community services information
	Alerts & Risks	Current and historical allergies and reactions
	Clinical Notes	Clinical items relating to the care and wellbeing of the patient
	Correspondence	Administrative items related to the care and administering of care
	Events	Encounters and referrals
	Medication	Medication (last 12 months or current and discontinued repeat medication, all medication issues) immunisations
	Observations	Observations such as blood pressure, height
	Problems	Active and inactive problems and conditions to a patient that impacts their health and wellbeing
	Summary Views	Summarised view of the key clinical information within a single view

Any CDV menu item that has information associated with it will expand when selected to indicate the source of the information. Selecting an item will then show the full detail within the main screen.
