Information

If unsure what referral type is required for your patients please refer to the Referral Types summary.

Referral Information

Referral Types

Urgent Community Response (2 hour response): Admission avoidance (available 8am-8pm) - This person needs a rapid community response within 2 hours to avoid acute hospital admission. The ITOCH will call the referrer back within 15 minutes regarding urgent action.

Non Urgent/ Routine Community Response: Routine, investigation, observation or treatment at place of residence - eg blood test, equipment, follow up or wound care. This is not urgent admission avoidance.

Hospital Discharge: This person needs to be discharged from any hospital setting eg. acute hospital, community hospital

Adult Social Care Assessment: To be used by a professional to request an Adult Social Care Assessment. This may include an urgent assessment, formal review, housing assessments or adaptations. By providing requested details, the ITOCH can decide the appropriate informal / formal assessment route.

Carers Assessment: To be used by a professional to request a carers assessment. By providing requested details, the ITOCH can decide the appropriate informal/ formal assessment route.

Falls Assessment Referral: For use by MIU/ UTC staff only for post falls follow up and intervention.

By using the drop down menu you can select the Referral type, please note this is a mandatory field and therefore, must be completed.
