

Delay, Disable, Cancel and Decease functions

This guide is for use within the IToCH hubs who are managing referrals

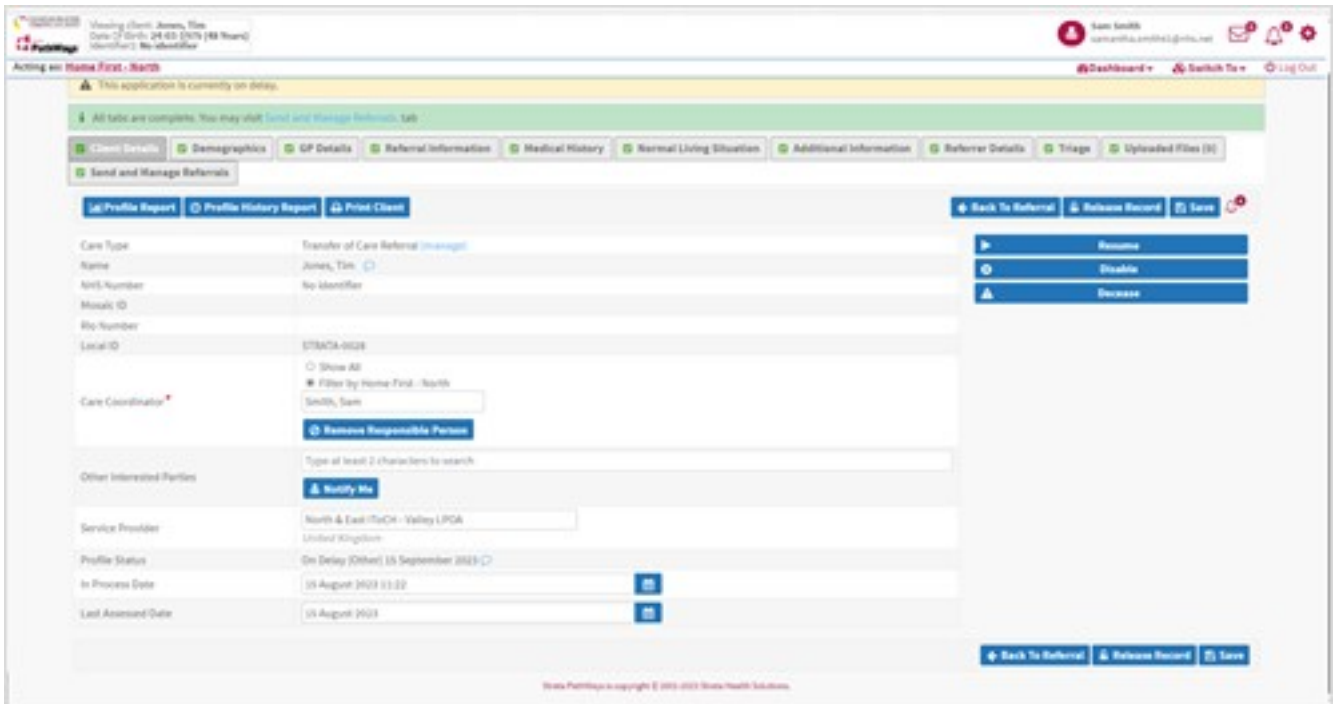

Delay:

Delay is at a care type level which means it will affect all open referrals within the care type. By clicking on the Delay button, it will add a delayed flag to the referral tile (see screenshot highlighted below).

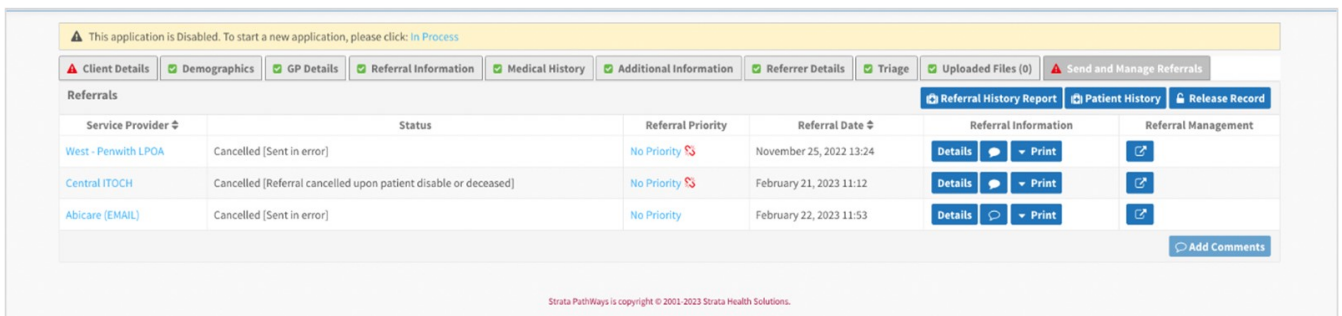

All the referrals will remain on the dashboard and in their respective queues but the 'Admit' button will not be active until the patient encounter is resumed by clicking on the 'Resume' button which is located in the same position as the delay button.

Disable:

Disabled – Closes the care type. This includes cancelling any open referrals that have not been changed to the admit status and will blank the form (not including demographics). Screenshot below shows a disabled record.

The user is unable to send referrals and all existing referrals have been cancelled. The user would have to put the care type 'In process' and complete the referral form again to send any referrals.

Cancel:

Cancel – specific to the referral transaction itself. Cancelling a referral will keep the care type open and the form will remain populated. All other referrals will remain open, it will just cancel the selected referral. Screenshot

below shows 1 referral still open for the patient and I have cancelled the referral to the CHAT team. If required, you could still send more referrals or resend a cancelled referral.

Service Provider	Status	Referral Priority	Referral Date	Referral Information	Referral Management
Central ITOCH <small>Alert: 1 Day(s) 35 Minute(s) old</small>	Accepted Updates sent	Hospital Discharge	February 21, 2023 13:24	Details	Admit
Community Hospital Admissions Team	Cancelled [Sent in error]	Hospital Discharge	February 21, 2023 13:25	Details	

[Add Comments](#)

Deceased:

Deceased – this will mark the patient profile as deceased. It will close all care types associated with the patient and cancel all referrals. Red flag will be displayed on the referral tile (see screenshot below)

CHAN Demo, Patient 4 Deceased Urgent Admission Avoidance

From: RCHT - AMU2
 Sent: 22 day(s) ago
 Transfer of Care Referral: December 8, 2022 16:00 (75 days ago)
 Referral cancelled upon patient disable or deceased
 Referral Updated: February 22, 2023 15:12
