

Copyright - basic guidance

What is Copyright

Copyright is a type of intellectual property that gives its owner the exclusive right to make copies of a creative work, usually for a limited time. The creative work may be in a literary, artistic, educational, or musical form. Copyright is intended to protect the original expression of an idea in the form of a creative work, but not the idea itself. [Wikipedia: Copyright](#)

Can I use this image, video, text ?
