

# E3 - Blood Spot labels

## E3 Maternity System

### Blood Spot labels

Blood Spot labels will be printed from E3. Once you have completed the Birth questionnaire and registration process you will be asked which documents to print, including the blood spot labels. Print the 'Baby Labels Layout document'.

If you need to go back later and reprint or regenerate the labels you can do this two ways.

1. Go back to the Birth questionnaire and save the last question again which will prompt the process as above. Select No to printing all other documents and Yes to Print Baby Labels Layout document.

Or

2. Once the labels are created you can then reprint them via the Menu option – Click on Patient and select Regenerate Reports from the drop down list.

The screenshot shows the E3 Maternity System interface. On the left, a sidebar menu is open to 'Regenerate Reports'. The main window displays a tree view of documents for a patient, with 'BloodspotLabelsPennice (Baby Labels Layout)' selected. Below the tree view, there are buttons for 'Regenerate Report' and 'Regenerate & Print', and a 'Number of Copies to Print' field set to 1. To the right of the dialog box, a patient data summary is visible, including NHS No., name, date of birth, sex, and hospital details.

NHS No:		NHS	
BRAZIL, BABY 24/10/2017	Female	BRAZIL, BABY 24/	
23 TREVALLION PARK, FEOCK,	TR1 3RS	23 TREVALLION F	
3200 g	A	3200 g	
Rank: 1/1	weeks	Rank: 1/1	
BARBARA BRAZIL	982 658 1593	BARBARA BRAZIL
